# PEONIES

This un-pretentious folder shows about 200 varieties of *Paeonia Chinensis*, fully 175 of which are entitled to be listed among the "World's Best Peonies." A dozen or more of the very recent creations are included, which we believe will stand the test of close observation, and receive a high rating.

The number preceeding the name of a variety is the rating of the American Peony Society, and except in the case of Japs and Singles, may safely be used as a basis of comparative merit. Le Cygne 99, as yet is the nearest approach to the 100 perfect mark.

The American Peony Society, in their recently issued "Peony Manual," give a check list of 1100 *Chinensis* varieties. From these the Society has selected about 300 doubles and 65 Japs and Singles, as being most worthy of Propagation. These varieties are accurately described, and they suggest that commercial growers offer no other kind for sale except these, and such new varieties as have not been sufficiently observed, to be properly classified. We are following this recommendation, and are not listing fully 150 other good varieties that we now grow. You may buy any peony named herein, with assurance that you will get a high class one.

The Japanese and Single peonies have been somewhat confused in commerce, and we have not found the ratings on them to be altogether dependable. We are including several of them with a low rating, that have been universally admired by visitors to our garden, and also a few of the higher rated ones, that appear mediocre. We are importing a large number this fall, because they have been highly recommended.

## SHIPMENTS

Will commence in early September and continue to December. Our oldest plants are three years old, and the large divisions that we ship will be made from these and from vigorous two-year-old plants. All will have three or more eyes and ample root systems. Orders amounting to \$3.00 will be sent prepaid. Any root not proving satisfactory, will be replaced or money refunded. Terms:—Cash.

The following are listed in the "Peony Manual," among the World's Best Peonies."

## DOUBLE CHINENSIS VARIETIES

85—ADOLPHE ROSSEAU, Early very dark red .....	\$1.25
87—ALBATRE, white, same as Avalanche, A prize winner .....	1.00

\*—Varieties marked with asterisk, are recent importations and cannot be shipped until released by the Horticultural Board.

# The World's Best PEONIES

The Varieties contained in this list, have been carefully selected, and most of them are undoubtedly the best peonies in commerce today. We are growing many other varieties which we do not include; and can furnish almost any variety called for, at prices asked by other Peony growers.

Our Garden is in the very center of the Famous Blue Grass Region of Kentucky, and this same limestone soil which produces the finest race horses and tobacco, in the world, seems especially adapted to the rapid growth and development of the Peony plant.

All Flower lovers are invited to visit us during the Peony and Iris blooming season, and see some of the wonderful new creations of these most beautiful of all garden plants.

We are on Twelfth Street in the northern part of Lexington, Ky., on the N. Broadway Branch of the Dixie Highway.
